ALCON LINK™
BE SMART, BE SECURE

8*GE POE+ Port +2*Gigabit SFP Up-link Port Smart Managed PoE Switch

Product Overview

Alcon Giga Smart Managed PoE Switch is based on a new generation of high-performance hardware & Software Combination with affordable cost for all types of projects.

AL-PGS5010WM-8P-2S-120 is a full gigabit L2 Smart managed PoE fiber switch independently developed by Alcon. It has 2*1000Base-X SFP port (optional single-mode/multi-mode, single-fiber/dual-fiber optical module). 8*10/100/1000Base-T RJ45 PoE ports 1-8 can Supports IEEE802.3af/at, with a power supply of 15.4W per port and a maximum power of 30W per port, it can automatically detect and recognize power-compliant devices that meet the standard and supply power through the network cable. It can supply power to PoE terminal equipment such as wireless AP, webcam, VoIP, sensor through the network cable.

The AL-PGS5010WM-8P-2S-120 has L2 Smart network management function, complete security protection mechanism, ACL/QoS policy and rich VLAN functions, easy to manage and maintain. Support multiple network redundancy protocols STP/RSTP(<50ms), to improve link backup and network reliability to ensure uninterrupted communication of important applications. According to actual application needs, port management, port flow control, VLAN division, IGMP, security policy and other application service configurations are performed through Web and other network management methods.

Gigabit access, gigabit SFP port uplink

- Support non-blocking wire-speed forwarding.
- Support full-duplex based on IEEE802.3x and half-duplex based on Backpressure.
- Support Gigabit Ethernet port and Gigabit SFP port combination, which enables users to flexibly build networking to meet the needs of various scenarios.
- Support physical single-mode single fiber optical path(Bypass) function, pure hardware switching, short switching time, does not affect the data transmission rate and improves the stability of the network system.

Security

- 802.1X authentication.
- Port isolation, storm control.
- IP-MAC-VLAN-Port binding.

Stable and reliable

- CE, RoHS.
- Low power consumption, No fan.
- The user-friendly panel, it can show the device status through the LED indicator of PWR, Link, PoE

Intelligent PoE power sup

- meeting the needs of security monitoring, teleconferencing system, wireless coverage, and other scenarios.
- IEEE802.3af/at PoE standard, without damaging non-PoE devices.
- Priority system for PoE port, it will supply power to the high priority level port first when the power budget is insufficient and avoid overwork of the device.
- PoE network management, realize PoE port power allocation, priority setting, port power status viewing, time scheduling, etc.

One-stop remote control and management

- HTTPS, SSLV3, and SSHV1/V2.
- RMON, system log, LLDP, and port traffic statistics.
