

# Thermal Temperature Detection Solution

---

**FIGHT WITH COVID-19**

# Background

## FIGHT WITH COVID-19

### PANDEMIC

COVID-19 spreads worldwide, it is infecting people and spreading easily from person-to-person, because there is little to no pre-existing immunity against this new virus. On March 11, the COVID-19 outbreak was characterized as a pandemic by WHO

### BORDER CONTROL

Pandemic of COVID-19 brings a huge challenge to border control for every country. Strict border control is necessary in order to avoid coronavirus spreading from foreign.

### SYMPTOM

Fever, cough, and difficulty breathing are the most common symptoms of COVID-19. Detection fever is an effective way to know suspected case and take action in time.

### PUBLIC PLACE CONTROL

Fever detection plays an important role in During outbreak everyone should be tested skin surface temperature in order to protect everyone's health before enter in border control process. public place, such as metro, bus, shopping mall, railway station or airport.

# Product features

FIGHT WITH COVID-19

## Flexible installation

Suitable for different brackets, easy to install for different scenarios.

## Bi-spectrum

Camera supports optical and thermal bi-spectrum image, which allow system detecting temperature and check situation at the same time.

## Non contact

Thanks to the thermal technology non-contact temperature measurement could be realized, which not only ensures public safety, also the staffs who are on duty at the same time.

# Product features

FIGHT WITH COVID-19

FEVER DETECTOR

## KEY FEATURES

Accuracy

Error range without blackbody

Error range with blackbody

Detection range

Detection distance

NETD

# Solution features

## FIGHT WITH COVID-19

### Solution structure and installation

#### Local management

Solution structure and installation  
Live view temperature and optical view at web interface or UI

#### Quick detection

Camera could detect up to 60 person per minute

#### Voice warning

Voice warning could be set at camera. It helps staff know abnormal situation immediately

#### Alarm management

When camera detects fever, alarm will be triggered via alarm output and speaker

#### Statistic

On NVR could do statistics about temperature detection

#### Good compatibility

Integrated with third-party platform or device via SDK or CGI.

#### Face capture

Automatic capture face from video stream  
Temperature overlay on face picture

# Solution features

FIGHT WITH COVID-19

## Fixed installation

Camera should be installed above the path for passenger detection shouldn't be more than 10

## Temporary control

It could be easy to install with the help of Tripod

# Working process

FIGHT WITH COVID-19

Install the camera in indoor environment

Connect the camera via PoE interface or power Interface

Set up a specific temperature measurement zone

Set up abnormal temperature trigger alarm & voice warning

Set up live view at web interface or on NVR

When alarm/ voice is triggered, stop person with abnormal temperature.

Double-check with a thermometer

Record situation

# Application

**FIGHT WITH COVID-19**

Scenario application

**Airport**

**Railway Station**

**Shopping mall**

**Office building**
